

Compact Wall Mounting System for PICMG Boards

About Wall Mounting Systems

Industrial Wall Mount PCs from the ENDEAVOUR range are versatile industrial-grade PCs with industrial-grade mainboards. Standard Slot-CPU boards with passive backplane technology are used here.

Expansion slots of different types allow customers to use additional boards with their own functionality. The industrial Wall Mount- ENDEAVOUR systems from Janz Tec can be equipped in different performance capabilities - from Intel Atom up to i7 technology. In addition to Rack Mount systems (ATLANTIS), they can be used on the outside of control cabinets, mounted on walls, or fitted into special machine housings. Janz Tec produces Wall Mount PCs from high-quality industrial components specifically to match your requirements.

Please ask for your individual system!

Example Systems

ENDEAVOUR-FSI1

- 2 models with different sizes to support various industrial applications
- Supports versatile 6-slot backplanes
- Supports front USB interface
- Especially equipped with a front-mounted 5.25" drive bay for an optical disk drive
